

Gehring Production

The competence center
for your large part machining

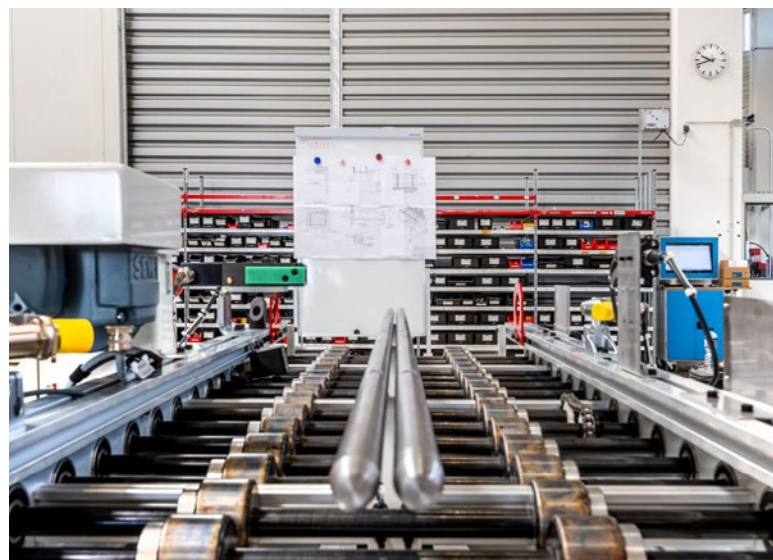

Excellence in motion.
Future in mind.

Efficient large part machining

Your advantages

- Mechanical processing in large dimensions and highest precision
- Many years of experience in machining of weldments
- CAD-CAM coupling - your CAD model as a basis for our machine programming
- Heat treatment of your workpiece
- Low throughput times
- Production capacity on an area of 8,700 sqm

LARGE PART

Machine portfolio	Dimensions (l x w x h)	Accuracy
Boring mill Soraluca FS14000	14000 x 3300 x 1600	0,03 mm
Boring mill Soraluca FS10000	10000 x 2800 x 1500	0,03 mm

Technical changes and deviations in design and equipment reserved

Machining center

Precision in large format

- Large, heavy, precise
- Up to 20 tons
- All metal materials
- CAD - CAM coupling
- From the idea to the finished part

Diameter control of the honed raceway

Diverse material processing

We can machine for you the following material:

- Structural steel
- Aluminum
- Cast iron
- Cast aluminum
- Stainless steel

Other materials on request.
